

DEPARTMENT OF HUMAN PATHOLOGY ACQUIRES FIVE HEADER TEACHING MICROSCOPE WITH PHOTOMICROGRAPHY ABILITY

Department of human pathology acquires five header teaching microscope with photomicrography ability. The teaching microscope is designed for bright field microscopy useful for examination of histology, cytology and haematology specimens. This increases the capacity of the anatomy pathology unit to support diagnostics, research and teaching.

This is an Olympus microscope with four objectives, 5 binocular eyepieces and high definition camera. This affirms the departments commitment in providing quality service to students and the public at large.
