

DR ABDALLAH WAS INTERVIEWED ON EBRU TV ON SICKLE CELL DISEASE

The interview was in preparation for the Sickle cell month of September. They discussed causes, management, prognosis and early signs of Sickle cell disease. The purpose was to create awareness of this condition and reduce the stigma and also for the government to recognize it as a condition that requires action and to reduce the cost of hydroxyurea, include it in the essential drug supply of public hospitals in the affected country.
